

European School of NeuroRadiology

World Federation of Interventional and Therapeutic Neuroradiology

COURSE IN FUNCTIONAL NEUROVASCULAR ANATOMY:

This Course in Functional Neurovascular Anatomy will be held next May 5-9, 2014 in Lisbon Portugal.

This is a joint course of the European Society of Neuroradiology (ESNR) and the World Federation of Interventional and Therapeutic Neuroradiology (WFITN).

Prerequisites for the participant:

ESNR and/or WFITN members has preferential status.

The applicant must be in training or be working with Interventional Neuroradiology.

Included in the registration fee:

Course material

Lunches, coffee and course dinner
CME credits and course attendance certificate

Not included in the registration fee:

Travel to and from the training site
Hotel rooms
Breakfast and dinners except course dinner.

FACULTY:

G. RODESCH, PARIS, FRANCE

M. SODERMAN, STOCKHOLM, SWEDEN

A. VALAVANIS, ZURICH, SWITZERLAND

J. BHATTACHARYA, GLASGOW, UK

S. BRACARD, NANCY, FRANCE

S. HOLMIN, STOCKHOLM, SWEDEN

P. MERCIER, ANGERS, FRANCE

V. PEREIRA, GENEVA, SWITZERLAND

P. VILELA, LISBON, PORTUGAL

PROGRAM

Monday 5/5/2014

9.00-9.15	Welcome and Introduction: Why Anatomy Presentation of students and speakers.
9.15-10.15	Anatomy of arteries and veins of the spine and spinal cord (G.Rodesch)
10.15-10.45	Surgical 3D anatomy of arteries and veins of the spine and spinal cord (Ph. Mercier)
10.45-11.00	<i>Coffee Break</i>
11.00-11.45	Embryology and Anatomy of the Internal Carotid Artery (G.Rodesch)
11.45-12.30	Cavernous sinus: internal carotid artery and its branches. Arterial variations (M. Soderman)
12.30-13.00	Surgical 3D anatomy of the cavernous sinus (Ph Mercier)
13.00-14.00	<i>Lunch</i>
14.00-14.45	Ophthalmic artery: embryology, anatomy , arterial variations (S. Bracard)
14.45-15.15	Surgical 3D anatomy of the ophthalmic artery (Ph Mercier)
15.15-16.00	Functional vascular anatomy of the maxillo facial region (V. Pereira)
16.00-16.45	Vascularization of the nasal fossa (J. Bhattacharya)

Tuesday 6/5/2014

9.00-9.45	Cranio cervical junction: pharyngo-occipital arterial system : embryology (proatlantal 1 and 2, hypoglossal), anatomy, arterial variations (S. Holmin)
9.45-10.15	Surgical 3D vascular anatomy of the cranio cervical junction (Ph Mercier)
10.15-10.30	<i>Coffee Break</i>
10.30-11.15	Transcranial anastomoses and cranial nerve supply (M. Soderman)
11.15-12.00	Vascularization of the middle ear (S.Holmin)
12.00-12.45	Functional vascular anatomy of the musculocutaneous arteries of the head and mouth (J. Bhattacharya)
13.00-14.00	<i>Lunch</i>
14.00-17.30	Workshops (Circle of Willis, Cortical Neopallial Arteries, ICA-ECA anastomoses and cranial nerve supply) Coffee Break(s) between working sessions

Wednesday 7/5/2014

8.30-9.15	Vertebro-Basilar system . PICA, AICA, SCA (P.Vilela)
9.15-9.45	Surgical 3D anatomy of the perforators of the vertebro- PICA region (Ph. Mercier)
9.45-10.00	<i>Coffee Break</i>
10.00-10.45	Intra axial vascularisation of the brain stem (S. Bracard)
10.45-11.15	Basilar Tip variations and perforating arteries (G.Rodesch)
11.15-11.45	Surgical 3D anatomy of the basilar tip and perforators (Ph. Mercier)
11.45-12.30	Angioanatomy of the Circle of Willis. Variations and Perforating arteries (V. Pereira)
12.30-13.30	<i>Lunch</i>
14.00-17.30	Workshops: Students Clinical Cases

Course Dinner

Thursday 8/5/2014

8.30-9.30	Anterior Choroidal Artery and Posterior Cerebral Artery: Embryology, anatomy, arterial variations (G. Rodesch)
9.30-10.15	Anterior Cerebral Artery and Middle Cerebral Artery (S.Bracard)
10.15-10.30	<i>Coffee Break</i>
10.30-11.30	Angioarchitectonic organization of cortical and white matter arteries (A. Valavanis)
11.30-12.30	Collateral circulation of the brain (A. Valavanis)
12.30-13.30	<i>Lunch</i>
14.00-17.30	Workshops (Spine and Spinal Cord, ICA-cavernous sinus-ophthalmic artery, ICA-VB perforators)

Coffee Break(s) between workshop sessions

Friday 9/5/2014

8.30-9.30	Intracranial Venous system: Cortical veins and dural sinuses: supra and infratentorial dispositions. Normal vascular anatomy and variations (P. Vilela)
9.30-10.30	Intracranial Venous system: deep cerebral veins and transmedullary system (S. Bracard)
10.30-10.45	<i>Coffee Break</i>
10.45-11.15	Surgical 3D venous anatomy (Ph. Mercier)
11.15-12.30	Workshops (veins and sinuses)
12.45-13.45	Exam
14.00	End of the course

COURSE VENUE: HOSPITAL DA LUZ - LISBON

Hospital da Luz is located at Avenida Lusíada n.º 100, alongside Colombo Shopping Center and near Estádio da Luz in Lisbon, with the following coordinates: latitude 38° 45' 22.64" N and longitude 9° 11' 34.99" W.

How to get there?

Underground

The underground is the best and fastest way to reach the hospital and congress venue.

The underground: **Linha Azul** (Blue Line), **Colégio Militar / Luz** station is located around 150 meters from the Hospital. (see the underground map in the next page)

Car

For those coming from the Center of Lisbon or from the North via the A1, use accesses via the Segunda Circular, North-South Expressway, IC 19, CRIL, Av. Pontinha, take Av. Lusíada and go in the direction of Colombo Shopping Center. The Hospital da Luz will appear on your right after the shopping center.

For those coming from the South via the A2, follow the North-South Expressway in the direction of the Segunda Circular and take the direction of Monsanto. Exit at the Colombo Shopping Center. Hospital da Luz will appear on your right after the shopping center.

A **paid car park** is available with approximately 500 places and is open 24 hours. It is located on Levels -2 and -3 of the Hospital building.

Taxi

There is a taxi rank alongside the entrance to the Hospital and another near Colombo Shopping Center, located approximately 150 meters from the Hospital.

Buses

For those coming by bus, the nearest stop serving the Hospital is 150 meters away, south of the main entrance. The Carris company buses that stop at Hospital da Luz are:

- **Number 729** (Algés / Bairro Pe. Cruz)
- **Number 765** (Av. Colégio Militar - Metro/ R. Ortigão Ramos)
- **Number 799** (Av. Colégio Militar – Metro / Alfragide Norte)

COURSE VENUE: HOSPITAL DA LUZ LISBON

ACCOMMODATIONS:

The course organisation suggests two types of accommodations at special rates: Hotel Tivoli Jardim and Residências Casas da Cidade.

As there are limited rooms available, participants are strongly encouraged to make room reservations early. After the cut-off date, hotel room availability and pricing may vary.

To book these two types of accommodations the students must contact the **local organisation**.

**A c c o m m o d a t i o n
Reservations will be
opening next March 10th,
2014.**

Hotel Tivoli Jardim

The Tivoli Jardim is close to Avenida da Liberdade, the main avenue in Lisbon and right next to the Tivoli Lisboa and the historical centre. It is approximately 7 Km from Lisbon Airport. Public transport is available right next to the hotel. The Metro station is 150 metres and buses and taxis can be caught right outside the hotel. The central location allows easy access to most of the city's points of interest, its famous neighbourhoods, monuments and museums.

Address: Rua Júlio César Machado, 7/9
1250-135 Lisboa, Portugal
GPS: N 38° 43' 13,24" W 9° 8' 50,21"
Tel: (+351) 213 591 000
Fax: (+351) 213 591 245

Residências Casas da Cidade

These apartments are located in the building just opposite from the hospital.

Other hotels

The participants may also choose to book by themselves the hotel accommodation in other hotels.

The organisation suggest a hotel location near an underground station that is the best transportation for the congress venue.

LOCAL ORGANISATION:

Cláudia de Lemos Silveira

Casas da Cidade

LISBON

Lisbon is the capital city and largest city of Portugal with a population of 547,631 within its administrative limits on a land area of 84.8 km². The urban area of Lisbon extends beyond the administrative city limits with a population of over 3 million on an area of 958 km², making it the 11th most populous urban area in the European Union. Lisbon is the westernmost large city located in Europe, as well as its westernmost capital city and the only one along the Atlantic coast. It lies in the western Iberian Peninsula on the Atlantic Ocean and the Tagus River.

Lisbon is recognised as a global city because of its importance in finance, commerce, media, entertainment, arts, international trade, education, and tourism. It is one of the major economic centres on the continent, with a growing financial sector and the largest/second largest container port on Europe's Atlantic coast.

Lisbon is one of the oldest cities in the world, and the oldest city in Western Europe, predating other modern European capitals such as London, Paris and Rome by hundreds of years. Julius Caesar made it a municipium called Felicitas Julia, adding to the name Olissipo. Ruled by a series of Germanic tribes from the fifth century, it was captured by the Moors in the eighth century. In 1147, the Crusaders under Afonso Henriques reconquered the city and since then it has been a major political, economic, and cultural centre of Portugal. Unlike most capital cities, Lisbon's status as the capital of Portugal has never been granted or confirmed officially – by statute or in written form. Its position as the capital has formed through constitutional convention, making its position as de facto capital a part of the Constitution of Portugal. Called the "Capital of the Lusophone world", the Community of Portuguese Language Countries has its headquarters in the city, in the Palace of the Counts of Penafiel.

Lisbon has two sites listed by UNESCO as a World Heritage Site: Belém Tower and Jerónimos Monastery. Furthermore, in 1994, Lisbon was the European Capital of Culture and in 1998 organised an Expo '98 (1998 Lisbon World Exposition).

Lisbon enjoys a Mediterranean climate. Among all the metropolises in Europe, it has the warmest winters, with average temperatures 15 °C (59 °F) during the day and 8 °C (46 °F) at night from December to February. The typical summer season lasts about six months, from May to October, although also in November, March and April temperatures sometimes reach around 20 °C (68.0 °F).
