

### **Alumni Meeting 2018**

of International Masters of Neurovascular Diseases (MSc)

Pierre Lasjaunias Neurovascular Education Team (PLANET)

5th-6th March 2018

13th Asian-Australasian Federation of Interventional & Therapeutic Neuroradiology (AAFITN) 2018

in conjunction with

Malaysian Society of Interventional Radiology (MYSIR) 2018 & Malaysian Congress of Radiology (MCOR) 2018

7th-9th March 2018

# SUBMIT YOUR ABSTRACTS TODAY! Online Submission is OPEN

Top 70 Abstracts will get :-

- Grant for Free Registration for the scientific conference
- Published in the highly prestigious International Neuroradiology Journal which is published in association with WFITN – World Federation of Interventional and Therapeutic Neuroradiology

The scientific committee welcomes the submission of scientific abstracts in terms of original clinical observations, descriptions of new techniques or procedures, case reports, and articles on the ethical and social aspects of related health care. Categories include:

- Aneurysm
- AVM
- Dural Fistula
- Stroke Treatment & Imaging
- Caroticocavenous Fistula
- Any other related Neurovascular Diseases

### **Abstract Submission Guidelines**

- Abstract MUST be submitted via www.afitn2018malaysia.com website.
- The title is limited to a maximum of 500 characters.
- Please provide the data of the co-authors (name, affiliations). Ensure that all author information is included and entered correctly.
- Please provide the abstract body text. The abstract body text is limited to a maximum of 1600 characters.
- The body must be divided into four sections:
  - » Purpose a brief statement of the report's purpose
  - » Materials and Methods numbers of subjects, procedures performed, analysis, methods
  - » Results major findings (for case reports these last two sections are replaced by summary of cases(s)
  - » Conclusion a one or two sentence statement of conclusions derived from the report
- All abstracts will be reviewed by the Scientific Committee.
- The Committee reserves the right to select the abstracts relevant to the sessions and decide on the final form of presentation.
- If the abstract is accepted, applicants **MUST** register for the conference and present the abstract during the conference.

### Disclaimer

The organisers of this event and AAFITN take no responsibility for any published abstracts submitted. Any issues or errors arising from the abstracts are solely the responsibility of the authors.

By submitting his/her/their work, the Author/s consent to the publication of the abstract, and transfer and assign to the Congress/AAFITN the rights to edit, publish, reproduce, distribute copies and to prepare derivative works such as press releases. Author(s) represent and warrants that he/she/they is/are sole author(s) of the work, that all authors have participated in and agree with the content and conclusions of the work, and that the work is original and does not infringe upon any copyright, proprietary or personal right of any third party. If the work is not original, Author(s) should reference original source and ensure all relevant permission and/or authorisation to re-use have been obtained.

# **AAFITN**

The Asian-Australasian Federation of Interventional and Therapeutic Neuroradiology (AAFITN) was founded in 1994 to promote the practice and knowledge of interventional and therapeutic neuroradiology in the Asian-Australasian region via the organization's regional meetings. Our society holds scientific conferences every two years, with the world federation meetings happening in between. A main element of the field is neuroendovascular therapy, which is currently experiencing rapid progress with the development of techniques and devices. Our membership has also grown over the years, with a current headcount of over 400. The society's Executive Committee is working towards making the society membership process more convenient as well as beneficial to its existing and potential members. The work that is given attention to includes improving the society's official home page, establishing the society constitution, development of educational programs and maintaining stable working funds.

Under the capable leadership of our past presidents, the following scientific congresses were successfully organised by:-

**Ling Feng** 1994 & 1996 - Beijing, China Akira Takahashi 2000 - Sendai, Japan Dong I. Kim 2001 - Seoul, Korea John Ching-Kwong Kwok 2002 - Hong Kong **Suthisak Suthipongchai** 2004 - Bangkok, Thailand Anil P. Karapurkar 2006 - Goa, India Michael Mu Huo Teng 2008 – Taipei, Taiwan **Winston Chong** 2010 - Melbourne, Australia Shigeru Miyachi 2012 - Nagoya, Japan **Pham Minh Thong** 2014 - Danang, Vietnam **Prijo Sidipratomo** 2016 - Bali, Indonesia

We look forward to our upcoming congress under:-

Jeyaledchumy Mahadevan 2018 – Kota Kinabalu, Malaysia Malaysian Society of Interventional Radiology (MYSIR) was established in 2012. MYSIR's mission is to be the primary national body in the development of interventional and neuro-interventional radiology and to provide excellent healthcare, research and teaching to enhance the standard of medical practice in Malaysia.

MYSIR believes that continuous education and training will mitigate these challenges. Apart from educational and awareness activities, the society has also formed ties with other interventional societies around the world to foster working relationship, exchange of ideas and training opportunities.

The College of Radiology, Academy of Medicine of Malaysia is under the umbrella body of the Academy of Medicine of Malaysia. Their members comprises of clinical radiologists, clinical oncologists and nuclear medical physicians. It is a nonprofit professional body and aims to serve patients and society by maximizing the value of radiology, clinical oncology, interventional radiology, nuclear medicine, medical physics and other allied health sciences.

## Message from Organising Chairman of the 13th Asian-Australasian Federation of Interventional and Therapeutic Neuroradiology (AAFITN) 2018

& President of the Malaysian Society of Interventional Radiology (MYSIR)

It is with great pleasure that we invite you to join us at the 13th Asian-Australasian Federation of Interventional and Therapeutic Neuroradiology (AAFITN) 2018 in conjunction with Malaysian Society of Interventional Radiology (MYSIR) 2018 and Malaysian Congress of Radiology (MCOR)

2018, which will be held in Kota Kinabalu, Sabah, Malaysia, 7th – 9th March 2018.

For this conference, the theme is 'Strengthening Foundations and Exploring New Concepts' and we are hoping to cover all aspects of neurovascular disease and intervention, including anatomy, imaging, surgery, recent advances, devices, techniques, training and genetic components. We also look forward to promote collaboration between the various disciplines and our regional partners.

In addition to the AAFITN programme, we will be running the concurrent Annual Scientific Meetings of MYSIR 2018 and MCOR 2018. In the MYSIR sessions, we will cover general interventional topics including interventional oncology, vascular, non-vascular and musculoskeletal interventions. We will also incorporate training sessions for radiology technologists and nurses to promote teamwork within our team, locally and regionally.

Interventional Radiology has grown in leaps and bounds since its' inception and it plays a crucial role in the management of patients in this era, where it is at the cutting edge of healthcare. MYSIR members are both interventional radiologists and neuro-interventional radiologists. We are a small but very

vibrant community and are actively training young radiologists to take up this dynamic speciality to fulfill the needs of healthcare in Malaysia, especially in the management of stroke. Thus, we encourage those with an interest in this field or who are working with professionals in this field to join us in this conference and learn from one another.

For this meeting, we chose Kota Kinabalu, Sabah as our host city. Kota Kinabalu International Airport is well connected to regional airports in our neighbouring countries. Sabah has much to offer the intrepid traveller from local cuisine to unique customs. There is something for everyone in the family. For those who enjoy the great outdoors, Sabah is home to some of the world's oldest rainforests. It is also the land of the legendary and mysterious Mount Kinabalu and beautiful islands which are an open secret with scuba divers from around the world. Come with your family and extend your stay after the meeting for a day out to visit Sabah, the Land Below The Wind, a prominent location in Borneo.

We encourage you to take this opportunity to be involved in this exciting Conference, and look forward to welcoming you in a warm Malaysian way, "Selamat Datang"!

Yours sincerely,

A. gryaledely Jevaledchumy Mahadevan

## Welcome Message by the President of Asian-Australasian Federation of Interventional and Therapeutic Neuroradiology (AAFITN)

On behalf of the organizing committee of the society of Asian-Australasian Federation of Interventional Neuroradiology (AAFITN), I would like to express my deepest gratitude for the opportunity to present this presidential address.

Neuroendovascular therapies have recently seen an increasing demand from an immense patient population in our area of the world, and this demand has been met to a large part by growing support and active performance by young ambitious neurointerventionists. In spite of such an opportune situation, which currently occupies the top market share, unfortunately there still is a lack of leading clinical reports drawing from our large clinical case series experience. Furthermore, we continue to follow the footsteps of western countries in regards to clinical experience with new devices, primarily because of a less established clinical research system and other administrative issues such as delays in new device approval. To compound this dilemma, perhaps the patients suffer most, especially because of the biased distribution of resources and insufficient number of neuroendovascular therapists in developing countries, resulting in less chances for patients to undergo minimally invasive therapy by endovascular or neurointerventional approaches.

We all know that these various differences and gaps pertaining to our unique situation stem from multiple rational, political, economic, religious and ethical standpoints. However, we must meet these expectations of our patients and the wellbeing of the public with enthusiasm and seek to challenge our borders and barriers with honest and pure pursuit of the

academic and educational road to the summit and beyond. To realize the further development of our society, friendship, cooperation and positive action among all members are essential. In particular, one of the most important issues which confronts us today, is the need to acquire the basic knowledge necessary to understand and formulate appropriate therapeutic and research strategies as well as to master upto-date techniques and thereby not fall behind world trends. From an academic point of view, which is expressed in the timely theme "Strengthening Foundations and Exploring New Concepts", I firmly believe the 13th congress of the AAFITN organized by Dr Jeyaledchumy Mahadevan will open the door to our bright future.

I trust that we, the AAFITN, are a deeply inter-connected group of dedicated strong-willed individuals who can together offer a great potential power to develop and expand further to help more of our people and the world at large.

Finally, I wish to express my whole-hearted appreciation for the generous cooperation and sincere contributions from all the members of the AAFITN to attend and support this meeting.

### Message from President of College of Radiology, Academy of Medicine of Malaysia (CoR)

In March 2018, the 13th Asian Australasian Federation of Interventional and Therapeutic Neuroradiology (AAFITN 2018) will for the first time be held in Malaysia. The College of Radiology, Academy of Medicine of Malaysia is very honoured to be a part of this prestigious event together with the Asian

Australasian Federation of Interventional and Therapeutic Neuroradiology & the Malaysian Society of Interventional Radiology.

The Malaysian Congress of Radiology component for this year will focus on back-to-basics and updates in the fields of Thoracic Radiology, Breast Radiology and also Musculoskeletal Radiology. There are also special sessions for radiographers/radiologic technologists in our programme.

This will be a great time for radiologists from all over Malaysia and the world to meet, make friends, renew friendships and exchange ideas about their knowledge and practice in this fascinating speciality of medicine we all love, Radiology.

Kota Kinabalu is a beautiful coastal city with amazing sunset views, a fascinating melting pot of cultures, great seafood and close to amazing beaches, dive sites and nature parks. We sincerely hope that besides enjoying the scientific programme of this congress, you will plan to take some time to see what Kota Kinabalu and its nearby attractions have to offer.

On behalf of the College of Radiology, Academy of Medicine of Malaysia, and also the organizing committee, I would like to wish everyone a warm "Selamat Datang" to this meeting.

Thank you.

Amir Fuad Hussain President of CoR 2016 - 2018

### **MYR 270 / USD 60**

Registration fees is inclusive of 6% GST.

### **SINGLE DAY REGISTRATION PASS**

- Valid only for 1 day per person.
- Includes tea / coffee break and lunch for that particular day only.
- Does not include conference materials and conference dinner ticket
- Free paper oral and poster presenters MUST register for the full conference.

To register, go to www.aafitn2018malaysia.com

<sup>\*</sup>Kindly note that this programme is **NOT** included in the main scientific programme registration fees. To attend this workshop, you will need to register for the full conference. Limited seats available.

The Magellan Sutera Hotel & Convention Centre, Sutera Harbour, Kota Kinabalu, Sabah, Malaysia

Kota Kinabalu is the capital of Malaysia's Sabah state in the northern part of the island of Borneo. It is strategically located and accessible by many flights from various Asia Pacific cities. Kota Kinabalu International Airport is Malaysia's second busiest airport.

It is a popular city for conferences as it boasts friendly Sabahans with great hospitality and a unique mesh of rich local culture and cuisine. It is a safe city that is protected by Mount Kinabalu, a UNESCO Heritage site and Borneo's tropical rainforests, one of the oldest in the world. Climbing Mount Kinabalu is a popular "bucket list" for many individuals and we anticipate many delegates will be making this a part of their AAFITN 2018 pre or post-conference adventure.

See you in Sabah, the land below the wind.

### **Conference Venue**

The Magellan Sutera Hotel & Convention Centre 1 Sutera Harbour Boulevard, Sutera Harbour, 88100 Kota Kinabalu, Sabah, Malaysia.

The grand entrance is a majestic longhouse style lobby; an architectural tribute to the Rungus natives of Sabah. With fine timber furnishings and traditional handicraft artifacts, this resort is a favourite with families and couples and those seeking a relaxing, tropical holiday in Borneo. The suites are lavishly decorated and present fabulous views of beautifully manicured gardens or the South China Sea set against a backdrop of the islands of Tunku Abdul Rahman Marine Park.
