

stroke management, pairs of neurointerventionists and stroke physicians from the same institution will be given preference. The expected benefit is to the individual and to his/her stroke unit and country. Based on the availability of seats, we will be accepting applications from single applicants and from non-Indian candidates.

The final decision on the acceptance of participants will be made by the organizing committee

SCIENTIFIC CONTENT

A daily teaching program by experts in all subspecialties of acute stroke treatment will be arranged. There will be joint sessions for neurointerventionists and stroke physicians in the mornings. There will be special afternoon sessions for stroke physicians and hands-on courses for neurointerventionists. The teaching sessions will be taken by international as well as national faculty who are experts in the field.

HOW TO APPLY

Please visit the following website (www.asss2022.com) and submit the online application form.

- A motivational letter by the participant explaining why he/she wants to participate and how this training would benefit his/her work and career.
- A curriculum vitae (250 words)
- A letter of support from the Head of the department, if he or she is a trainee or fellow.

Selection of applicants will be based on their CV and motivation. Accepted candidates will need to confirm that they will participate in the course.

DEADLINE FOR APPLICATIONS

Last date for submitting the application is 30th July 2022 (23:23 IST).

The Asian Stroke Summer School 2022 is a prestigious educational summit for stroke trainees throughout Asia organized by a team of expert stroke physicians.

VENUE

The Asian Summer School will take place in Thiruvananthapuram from 8 - 11 December 2022.

OUR GOALS

The primary goal of the Asian Stroke Summer School 2022 on the interdisciplinary treatment for acute stroke is to link young stroke physicians with young neurointerventionists in order to enhance interdisciplinary management of patients with acute ischemic stroke.

The school will be offering a series of high-quality teaching sessions and courses on acute stroke management to facilitate the participants in building a stroke treatment network in their respective regions. They will be equipped with the knowledge of the critical factors in the successful optimization of the in-hospital workflow and the selection of patients who are candidates for revascularization, both endovascular therapy and intravenous thrombolysis.

The aim of the summer school teaching course is to aid stroke physicians and neurointerventionists to work as a team in order to enhance the interdisciplinary management of stroke patients.

The school will provide hands-on training for neurointerventionists and special teaching sessions for stroke physicians. A unique combination of plenary sessions, complex cases discussion, group tutorials followed by courses on selected stroke medicine topics will be conducted to foster advances in the knowledge and treatment management of this interdisciplinary field.

WHO CAN APPLY?

Young stroke physicians and neurointerventionists who have a major interest in cerebrovascular diseases are eligible to apply. Applicants must currently be in training or practice in an Asian teaching hospital that treats acute stroke patients. Since the main aim of the course is to enhance interdisciplinary
